

Project: Healthcare Scheme  
Client: Quattro Design Architects, Gloucester

jra has always been fascinated by the potential of 3d computer aided design and visualisation in the architectural design process.

This book represents some of the CGI work completed during 2008.

As architects with creative cad expertise, we frequently become engaged early on in the design process working as 3d consultants with other architects to help model, visualise and develop their architectural ideas. jra also produces high quality marketing material for developers.

jra can also provide professional cad training and sales in Vectorworks, Artlantis, Cinema 4D, Sketch Up, Photoshop and In Design.
